

FireHawk G3

The G3's ultra-fine optical coating improves uniformity for consistent brightness across the entire screen

FireHawk G3 is a flexible front projection screen surface engineered for use with 1080p technology. The G3's ultra-fine optical coating improves uniformity for consistent brightness across the entire screen. FireHawk G3 is optimized to significantly improve contrast ratios, regardless of the projector type. It is a perfect choice for front projection applications where ambient light may be present providing increased black levels, shadow detailing, and superior color saturation.

FEATURES

- Engineered for use with 1080p projection technology
- Re-formulated optical coating allows for enhanced focusing capabilities
- Superior performance in environments with ambient light
- Superb black levels, shadow detailing, and color saturation
- Increased image contrast and resolution
- Superb color and white field uniformity

Material Type	Flexible Front Projection
Gain	1.25
Half Gain	30 degrees
Minimum Throw Distance	1.6 x image width
Ambient Light Front Reflectance Value	27%
Ambient Light Resistance	Excellent
Lay Flat Quality	Excellent
Flame Resistance	Yes
Optional Sound Perforations	Microperf X2
Size Limitations	Contact Factory
Seamless	Yes
Screen Models	Fixed, retractable, variable masking
