Peak Gain	0.9	Passive 3D Use	No
Half Gain	75°	Lay Flat Quality	Excellent
Ambient Light Rejection Value	41%	Flame Resistance	Yes
Ambient Light Resistance	Moderate	Perforation Options	Yes

GrayHawk LS is the large format version of GrayHawk G4. The neutral density gray shade is shared – size constraints are not. **GrayHawk LS** can be furnished in seamless, 40 by 90 feet fixed frame applications as well as in the largest format, retractable screens in the world. **GrayHawk LS** extends the ability of the GrayHawk G4 fabric into larger dimensions. This neutral density gray, flexible front projection screen material enhances black levels in non-optimum viewing environments where wide seating is still needed. **GrayHawk LS** is just below unity gain and has excellent off-axis viewing characteristics. It is a great compromise of features, calibrated to deliver superb results.
