Peak Gain	1.3	Passive 3D Use	No
Half Gain	27°	Lay Flat Quality	Excellent
Ambient Light Rejection Value	80%	Flame Resistance	Yes
Ambient Light Resistance	Excellent	Perforation Options	Yes

Phantom HALR Plus is a flexible front projection, high ambient light rejecting screen material. Formulated for use in multipurpose viewing applications, it eliminates the concerns of a washed-out image due to uncontrolled ambient light. The elevated gain provides a needed boost to projectors requiring a little more punch. **Phantom HALR Plus** is offered in any image size up to 40 by 90 feet – completely seamless. It is available with Stewart’s exclusive MicroPerf X² THX Ultra or CinemaPerf for acoustic transparency. **Phantom HALR Plus** is a Stewart Filmscreen image surface, guaranteeing a viewing experience with stellar color uniformity and visual fidelity in a high ambient light application.
