Gain: 1.3, Max. Size: 40'x90'

*Established by quoting the smallest size screen available without any upgrades or optional features.

**Max sizes are based on front projection. Contact factory for your rear projection project.

The **AllRise** is the ideal solution when projection is needed, but the room does not accommodate a traditional, drop down or ceiling mounted screen. Emerging from a low mounted housing on precision driven arms, the **AllRise** is designed to fully deploy a perfectly tensioned screen surface. Typical applications include historic, architectural spaces which cannot be modified, as well as high ceiling houses of worship and many other multi-use venues where vaulted ceilings do not allow for a descending screen to be mounted from above. The **AllRise** is fully featured with Tab-Guy tensioning, and is available in all front and rear category leading, 16K+ projection screen fabrics.
