

# Mystik!

Self-Adhesive Projection Screen Material

An immersive, high performance solution for storefront projection

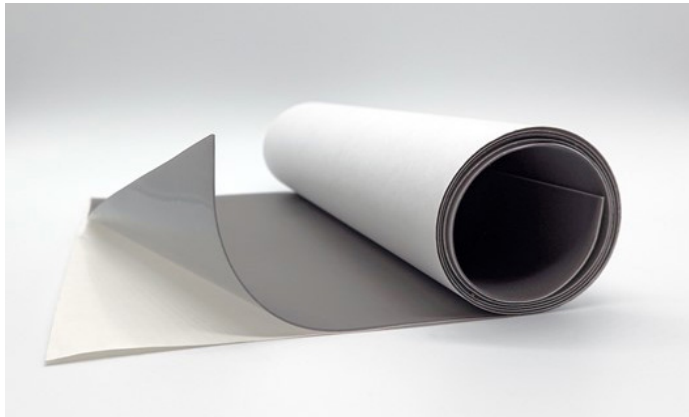

**Stewart**  
FILMSCREEN

The Reference for Stunning™

## Obtain a world class image in unexpected areas

**Mystik!** applies directly to existing storefront windows and room dividing glass. There is no heavy substrate to move and support. **Mystik!** can also serve as proof of concept, prior to further investments in imaging surfaces.

## Straight forward, intuitive installation

**Mystik!** goes on well with our pressure sensitive adhesive. It will roll on or squeegee down to your glass or plastic surface with ease.

## Choose any of our category leading 16K+ projection fabrics

When it comes to projection screen material, one size does not fit all. Our front and rear projection fabrics are made to answer the individual needs of our customers. We embrace any and all types of projector tech including high ambient light and ultra short throw projection. Talk to the experts at Stewart, and we will help you make the best decision to meet your viewing needs.

**Mystik!** allows you to take Stewart's category leading 16K+ projection screen fabrics and apply on-site via a pressure sensitive, adhesive functionality. Now you can apply a top quality, imaging surface directly onto a window or room divider.
