Producers of Professional Projection Screens

Stewart Filmscreen is the champion provider of large format, electric roller screens. When ceiling mounted, a **Stealth Grande S6** can provide up to 23 feet 11 inches of image width and is seamlessly hidden with a trapdoor ceiling closure. Featuring a heavy duty, continuous motor, this screen is designed for recurrent use. These impactful screens can be found in large auditoriums, lecture halls, and major museums — but you will have to look for them. They are well hidden until they are deployed.
