*Established by quoting the smallest size screen available without any upgrades or optional features.

Over 25 different optically immaculate screen materials are available for Stealth

Stealth is a beautiful, small format retractable screen system with a trapdoor closure, allowing the screen to be completely hidden from view until deployment. **Stealth** offers exceptional reliability and features quiet operation, along with a choice of several electronic control options. Always seamless, **Stealth** is available in any of Stewart's front or rear 16K+ projection fabrics with image widths up to 13 feet. **Stealth** can also be equipped with optional camera deployment for video conferencing. Optional vertical or horizontal masking is also available.
