## Producers of Professional Projection Screens

Three different framing solutions, each tailored to a specific application, are available on our snap mounted screens. All frames are built using high-quality, aircraft grade aluminum and are hand finished with a rich, velvet Velux overlay. Our snap system is designed to perfectly align our 16K+ front or rear projection fabrics with the frame so installation is quick and easy. Image widths can vary depending on height, but all **WallScreens** can readily go to 19 feet 5 inches in image width.
